By manufacturing and selling many thousands square meters of ceramic membranes in the two last decades, TAMI Industries is one of the main actors in filtration, separation and purification in the industry.

TAMI Industries' membranes are made of unique conception and inovative materials.

TAMI Industries has four subsidiaries in Deutschland, China, North America and Latina America, and is also present in 30 countries through its distributors' network.

Our research et development department is working constantly on inovations and ongoing programs increasing efficiency and finding solutions for your specific industrial applications. Our knowledge and experience in process and engineering makes TAMI Industries your ideal partner.
